

# Sin, Suffering and Science

can we reconcile the findings of science  
with the message of the Bible?

**Professor Andrew Halestrap**

(Senior Research Fellow), University of Bristol

The findings of science indicate that death and disease, earthquakes, floods and droughts etc have been part of the fabric of creation from its very beginning. So how does that fit with The Fall as described in Genesis, and how could a God of love have created a world that allows such suffering? I will explore a Christian perspective that respects both Science and Scripture while admitting that there is a mystery here that we will never truly fathom.

I will suggest that there are insights that science brings that may help us in our conversations with

non-Christians for whom a common response is "I cannot believe in a God who created a world full of suffering".

Thornbury Baptist Church, BS35 2EG

**Sunday February 16th 2020**

**6.30 pm - 8.00pm**

office@thornburybaptistchurch.org.uk

Andrew is Emeritus Professor of Biochemistry and Senior Research Fellow at Bristol University. Andrew was a senior academic at Bristol University for many years. He has published more than 200 original research papers and was elected a Fellow of the Academy of Medical Sciences in 2008. In 2010 he was awarded the Keilin Memorial Lecture and Medal of The Biochemical Society. Andrew has served in various leadership and teaching roles in the church and academia and until recently he was the National Chair of Christians in Science. He is passionate about helping people to see how Science is a friend and not an enemy of the Christian Faith.
